

Are you a nurse?

Do you want to know more about genomics?

Not sure where to start?

**Download our Nursing Genomics Learning
Passport today!**

All nurses need to know about genomics. There are many resources to support your genomics learning, but it can be confusing to know where to start. The Genomics Learning Passport has been designed to guide you through the key resources and record your genomics learning journey in a format that meets requirements for revalidation. Starting at the basics and moving on to more complex topics, the Passport is in three parts:

Part 1: The essentials and core concepts in genomics that all nurses need to know

Part 2: Specialist learning for nurses in specialist roles or who have an interest in genomics

Part 3: Where to find out more: further resources and information to progress your self-directed learning.

The Passport is a word document based on the NMC revalidation CPD activity log. Once downloaded, you can edit it as required for your revalidation.

Download the passport using the QR code or visit this link:
